

ADVANCED INTEGRATIVE SOCIAL WORK AND NURSING PRACTICE

The Advanced Integrative Social Work and Nursing Practice graduate certificate focuses on clinical interventions, systems of care and policy related to individuals living with co-occurring health and mental health disorders.

The Advanced Integrative Social Work and Nursing Practice certificate addresses prevention, treatment and recovery at the micro-, mezzo- and macro-levels. Students will learn to identify, describe and apply micro clinical interventions to promote wellness and recovery for individuals, understand mezzo organizational systems of care related to the intersection of social work and nursing, and analyze and influence macro health care policy in the United States.

Course work draws on theory, biopsychosocial assessment, diagnosis and treatment goals to select and implement evidence-supported interventions focused on physical and mental health disorders.

The Advanced Integrative Social Work and Nursing certificate is available to all Master of Science in Nursing students, Master of Social Work students (on-campus and online options), and graduate students or employed professionals from other disciplines.
