

ADVANCED CLINICAL SOCIAL WORK PRACTICE

The graduate certificate in Advanced Clinical Social Work Practice prepares students for practice in clinical settings by enhancing their theoretical, empirical and practice knowledge relevant to these settings and by offering a blend of didactic and experiential learning.

Through an intersectional lens, students in the Advanced Clinical Social Work Practice graduate certificate course enhance their understanding of critical elements of advanced clinical practice, such as assessment and conceptualization, diagnosis and treatment.

Given that social workers treat diverse client populations, this certificate also encompasses a commitment to social justice and addressing barriers to mental health treatment. Students will also learn to evaluate the impact of systemic racism, sexism and heterosexism on access to care.

The Advanced Clinical Social Work Practice certificate is available to all Master of Social Work students and alumni (on-campus and online options).
